DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-40, drawn to radio telecommunication system in message store, having message notification, classified in class 455, subclass 403, 412.1, 412.2.
 - II. Claims 41-55, and 78-85, drawn to system equipment for providing wireless link, switching or routing, classified in class 455, subclass 424, 554.2, 428.
 - III. Claims 56-77, drawn to caller identification, classified in class 455, subclass 414.
 - IV. Claims 86-95, drawn to radiotelephone detail, classified in class 455, subclass 550.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions group I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as detail for providing wireless link, radiotelephone detail, caller identification. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for Group I, II, III is not required for Group IV, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed, (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
